Objective

The Monarch Butterfly Fund is a public-private effort developed in collaboration with federal and state government institutions, civil society organizations and forest landowners to support the conservation of the forests in the core area of the Monarch Butterfly Biosphere Reserve (RBMM, acronym in Spanish) administered by the National Commission of Protected Areas (CONANP, acronym in Spanish).

Lines of work

- 1** Benefit to the owners of the core area for the provision of ecosystem services.
- 2** Support for investments and compensation for the adoption of good management practices.

- 3** Environmental monitoring.
- 4** Support for investments and compensation for the adoption of good natural resource management practices.

Ejidos, indigenous communities and small properties that participate in the Monarch Butterfly Fund.

Achievements

12,367 hectares under sustainable use.

Positive impact on the well-being of **9,119 local inhabitants.**

33 agrarian nuclei

benefited by payments for ecosystem services.

Data updated at the end of 2022.
