Objective

FANP is a public-private collaboration scheme between FMCN and the National Commission of Protected Areas (CONANP, acronym in Spanish), which aims to support the efficient use of financial resources channeled to Mexico's protected areas (PAs) to strengthen their operation and management and ensure the long-term conservation of representative ecosystems.

Lines of work

- 1 Strengthening the National System of Protected Areas.
- 2 Strengthening the operation of 70 federal PAs.
- 3 Immediate attention to extraordinary environmental contingencies in 70 priority federal PAs.

Achievements

FANP contributes to the conservation of **7.7%** of the total **terrestrial** area and **8.5%** of the **marine** area.

Data updated at the end of 2023.
