## Objective

The objective of the Fire and Restoration Management Fund (FOMAFUR, acronym in Spanish) is to finance and strengthen fire protection activities, integrated fire management, and the restoration of areas affected by fire in top priority regions for biodiversity in Mexico.

## Lines of work

- 1** Fire prevention and protection, and capacity building to implement strategies to reduce fire danger and negative impacts on federal protected areas (PAs) and their surrounding areas.
- 2** Fire management to conserve and restore fire regimes and reduce negative impacts on biodiversity and its environmental services.
- 3** Restoration of burned areas through the recovery of the structure and functions of affected ecosystems.

## Achievements

**108 projects** from 54 local and community organizations funded.

**35 PAs** protected against fires.

Protection actions against fires and fire management in **16 entities of Mexico.**

Data updated at the end of 2023.

## Allies

### Donor:

- U. S. Forest Service

### Partners:

- Division of Forestry Sciences at the Autonomous University of Chapingo
- Institute of Ecosystems and Sustainability Research at the National Autonomous University of Mexico
- Manantlán Institute of Ecology and Biodiversity Conservation at the University of Guadalajara's South Coast University Center
- National Commission of Natural Protected Areas
- National Forestry Commission
