

CoSMoS Conservation and Sustainable Use of Mountains and Mountain Ranges

Results

- A** The effective management of Protected Areas (PA) has been strengthened.
- B** The restoration of mountain ecosystems has contributed to increasing biodiversity conservation and ecosystem services.
- C** The local economy has been strengthened through the sustainable use and management of the goods and ecosystem services provided by federal PAs.
- D** The project has digital infrastructure and applied technology to enhance decision-making in conservation, as well as effective communication for environmental education.

Legend

 Protected Area	 Ecosystem restoration
 Influence zone	 Sustainable use
 Firefighting brigades	 Sustainable tourism
 Community-based local monitoring	 Infrastructure and technology for monitoring
 Regional monitoring	 Communication
 Environmental education
